

Short Clinical Exchange Programme List of CRECs

Belgium

Saint-Pierre University Hospital – HIV Reference Center

City: Brussels

Description:

- 3.500 patients
- Phase I to IV clinical research unit on HIV and infectious diseases

Fields of expertise:

Clinical research on:

- ARV
- Cure/remission
- HPV co-infection
- Vaccinology
- Sexually transmitted diseases/PrEP
- Antibiotics

Language requirement: Good level French mandatory

Contact person: Prof. Charlotte Martin

France

Pitié-Salpêtrière Hospital- Service des Maladies Infectieuses et Tropicales

City: Paris

Description:

- 4500 patients
- A large clinical research unit including HIV strategy, Anti-HIV new drugs, STI studies, PrEP
- 15 clinical consultations weekly; PrEP clinics
- Daycare hospital

Fields of expertise:

- HIV clinical management
- Antiretroviral strategy
- Clinical research
- Sexual health clinical /research
- PrEP
- Hepatitis B and C

Language requirement: French, English

Contact persons: Prof. Christine Katlama, Dr Romain Palich

St. Antoine Hospital, AP-HP, Infectious Diseases Department

City: Paris

Description:

- Inpatient clinic where 15% of hospitalised patients are HIV-positive
- Outpatient clinic with 4500 HIV+ patients regularly followed by 18 doctors
- Sexual health clinic with PrEP and STIs screening and treatment
- Immunisation centre with international travel counseling
- Clinical research covering all steps of HIV research, from phase 1 to phase 4 trials and cohort analysis – Member of EuroSIDA consortium
- Centre of excellence in HIV hepatitis co-infection

Fields of expertise:

- HIV treatment (efficacy, tolerability and safety): phase 1 to 4
- Co-morbidities associated with the use of ARVs
- HIV-tuberculosis co-infection
- HIV-viral hepatitis co-infection
- Multi-resistant bacterial infections in patients on PrEP

Language requirement: French, English

Contact person: Dr Karine Lacombe

St. Louis and Lariboisière Hospital, Infectious Diseases Department

City: Paris

Description:

- 4500 HIV-infected patients
- 4000 PrEP patients
- Research areas: Antiviral therapy, PrEP, STIs

Fields of expertise:

- Antiretroviral therapy
- HIV-related co-morbidities
- PrEP
- STIs

Language requirement: English, French ideally

Contact person: Prof. Jean-Michel Molina

Germany

University Hospital Bonn, Department of Medicine I

City: Bonn

Description:

- 1200 patients
- Main area of interest: HIV and liver disease

Fields of expertise:

- Hepatitis B and C
- Fatty liver disease
- Vaccinations
- Large ID ward with TB and opportunistic infections
- Immunology lab with focus on NK cell research

Language requirement: English

Contact person: Prof. Jürgen Rockstroh

Netherlands

Erasmus MC

City: Rotterdam

Description:

The Erasmus MC is a large University Medical Centre in The Netherlands. We provide clinical care to ~ 2500 HIV-1 positive adults, ~ 75 HIV-1 positive children, and ~ 50 HIV-2 positive adults. In addition, we provide clinical consultation and HIV diagnostics to other centres in The Netherlands and abroad. Our research activities focus on antiretroviral drug resistance (in particular INSTIs), new mechanism of antiretroviral drug resistance, HIV cure research, mathematical modelling of the impact of HIV prevention and emergence of HIV drug resistance, HIV-2, HIV clinical research including HIV therapy trials, and HIV awareness programmes. Erasmus MC collaborates with multiple centres within The Netherlands and abroad, among which the UMC Utrecht. The programme we offer will be a joint programme with UMC Utrecht (dr. AMJ Wensing) and will take place in the Erasmus MC.

Fields of expertise:

- Clinical care of HIV-1 positive adults and children. Clinical care of HIV-2 positive adults.
- Antiretroviral resistance of HIV-1.
- Antiretroviral resistance of HIV-2.
- HIV therapy trials.
- HIV cure research.
- Aware HIV.
- HIV diagnostics.
- Mathematical modelling of impact of HIV prevention and emergence of HIV drug resistance.

Language requirement: English

Contact person: Dr Jeroen van Kampen
